

## *the ultimate discovery lab*

A high-speed, intelligent conveying system is coupled with state of the art robotics and software integration, streamlining your entire laboratory workflow and drastically reducing sample cycle time from weeks to days

### **Lights Out**

Increase your throughput and decrease the need for many technicians/instruments with 24/7 lab operation

### **Consolidated Discovery**

Simplify and interconnect lab-to-lab functions by bringing them all together in one collaborative space

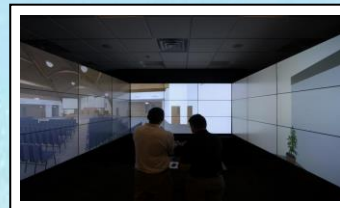

### **Info Anywhere**

With virtual reality tour control, you can access, monitor, and control data wherever you are in the world

### **Smart Shuttle**

Avoid dependency on robotic arms with this non-linear intelligent conveying system

### **Remote Lab**

Remote, web-based sample ordering, monitoring, and tracking

**flexlab powered by...**

**THE MORSE GROUP**

### ***What You Get When You Partner With Us...***

- Virtual walkthroughs of your system and lab space to transform brainstorming into reality
- Seamless integration and customization of your preferred instruments and scheduling software
- Integral safety team to ensure safe working conditions
- Unique approach to project management and engineering where we become an extension of your company
- Turn-key solutions ranging anywhere from facility infrastructure design and construction, automation design & build, and device integration
- A team and culture that creates a positive, comfortable, and innovative environment for your project

***Exclusively from...***
