

SIMPLE SAVE

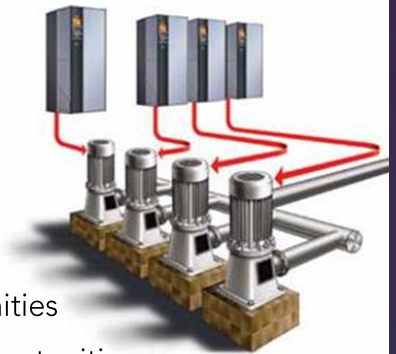

A simple and fast energy savings program for industrial manufacturers

Imagine a solution that reduces energy usage and costs, eliminates peak demand charges, and reduces wear and tear on mechanical equipment. *Simple Save* by Tek-Matic is a simple energy savings program that has extremely fast payback and requires barely any of your time and resources to implement. Simple Save benefits companies that have fans or pumps and are looking for reductions in energy usage and costs.

How Does *Simple Save* Work?

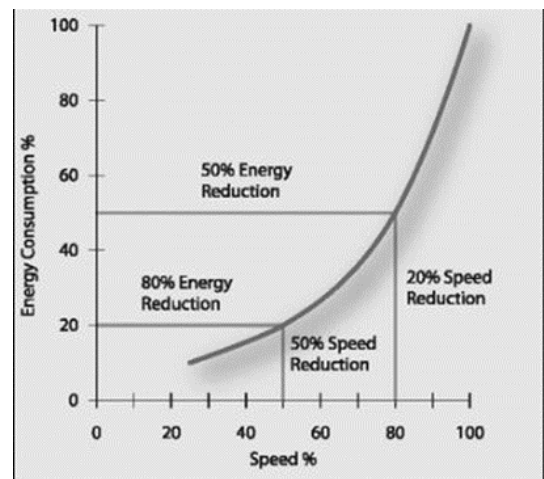

- *Intro*- Your Tek-Matic Energy Consultant will introduce our program to you
- *Discovery Survey*- Our team will survey your facility for energy savings opportunities
- *Analysis* – We will analyze the survey and calculate all of the energy savings opportunities
- *Review* – Your Tek-Matic Energy Consultant will share the results and propose a savings plan
- *Launch* – You say go and our team kicks off the implementation process.
- *Implement* – Our tech team will come on site to install and commission your energy saving solutions
- *Savings*- You begin to benefit from the proposed energy savings.
- *Rebate*- As a bonus, you will receive a cash rebate which adds to the savings and shortens the payback time

Why are we getting involved?

We saw that not all companies were realizing the benefits and fast ROI that can be accomplished with energy savings and rebate programs for smart motor control. Many companies struggle to identify the best energy savings applications in their facility, and the best routes to fast ROI.

With our 30+ years of experience in process and motor control we are able to help companies eliminate the logistical and implementation barriers, to make energy savings cost effective and seamless to implement.
